

Weekly Progress Report

Name: Mohammed Amaan Chhipa

Domain: Python

Date of submission: 12-06-2024

Week Ending:

I. Overview:

This week, the primary focus was on developing a Password Manager using Python. The aim was to securely store and manage user passwords, generate strong passwords, and allow users to retrieve stored passwords when needed.

II. Achievements:

1. Password Manager Development:

- Designed the basic structure and user interface for the Password Manager.
- Implemented encryption algorithms to secure password storage.

2. Strong Password Generation:

- Developed functions to generate strong, random passwords.
- Tested the password generation functions to ensure robustness and security.

3. Database Integration:

- Set up a database to store and retrieve user passwords securely.
- Successfully implemented functions to add, update, and retrieve passwords from the database.

III. Challenges:

1. Encryption Implementation:

- Faced challenges in selecting and implementing the most effective encryption algorithms.
- Ongoing efforts to optimize encryption processes for better performance.

2. User Interface Design:

- Encountered difficulties in designing an intuitive and user-friendly interface.
- Working on feedback to enhance the usability of the application.

IV. Learning Resources:

1. Encryption and Security:

- Utilized online resources and documentation on encryption algorithms and best practices.
- Participated in webinars and tutorials to understand the latest trends in cybersecurity.

2. Python and Database Integration:

- Engaged with Python tutorials focusing on database operations and secure coding practices.
- Participated in coding forums to seek advice and share knowledge.

V. Next Week's Goals:

1. Enhance Security Features:

- Improve the encryption mechanisms and add additional layers of security.
- Conduct thorough testing to identify and fix potential vulnerabilities.

2. User Interface Refinement:

- Implement feedback to refine the user interface for better usability.
- Test the interface with potential users to gather further insights.

3. Functionality Expansion:

- Add more features such as password strength indicators and password recovery options.
- Collaborate with team members to integrate these features seamlessly into the application.

VI. Additional Comments:

“Include any additional comments or observations regarding overall progress, collaboration, or notable experiences during the week.”
